

SUPERHEAT™

SMARTPAK

EQUIPMENT HIGHLIGHT

MINIMIZE RISKS

IMPROVE QUALITY

REDUCE COSTS

SAVE TIME

Superheat SmartPak™ provides intelligence at your workpiece.

- The first and only tool available that provides real-time temperature monitoring at the workpiece for enhanced quality assurance with 6 times the thermocouple capacity of other suppliers
- Near field communication via the **Superheat SmartCard™** creates safety lock-out capabilities at the weld location to minimize risk of electrocution and other hazards
- Traffic light system technology provides indications to welders, for QA compliance actions as part of the welding process
- Component fault indicators which can lead to immediate corrective actions

BETTER SAFER FASTER™

ADVANCING HEAT TREATMENT™
